SUMMARY

Over more than 9 years of experience in software development including Project Management, Enterprise software development domain. Oversee more than 40+ projects in technologies including PHP, and PHP frameworks (Larval, Yii, Code igniter). Excellent track record in leading and managing multiple projects through all phases of project life-cycle from conceptualisation to post-implementation support across diverse geographical locations, technologies, and large team sizes.Understating and experience in software estimation of a complex system, creation of quality matrix and project plan, and adherence to standard delivery processes within the organization. Excellent interpersonal skills in communications and client/customer relations. Hands-on with various development tools like Eclipse, Netbeans, Jira, and Git. Very good understanding of Waterfall, Agile, DevOps processes, and concepts.

CERTIFICATION

• Initiating and Planing Projects From LearnTube
• Introduction to Project Management From LearnTube.

EXPERIENCE

Technical Delivery Manager
Dogra Technologies Pvt Ltd   **September 2017 - Present**

• Managed a team of project managers and technical experts to ensure the successful delivery of complex IT projects, including software development and infrastructure deployments.
• Developed and executed project plans, setting clear milestones and timelines, resulting in a 95% on-time project delivery rate.
• Collaborated with cross-functional teams, including development, quality assurance, and operations, to streamline project workflows and improve e ciency.
• Oversaw project budgets, resource allocation, and risk management, resulting in cost savings of 15% over the course of a year.
• Oversee the end-to-end project lifecycle from initiation to closure.
• Develop and manage project plans, timelines, and budgets.
• Ensure projects are delivered on time and within scope.
• Lead and mentor a team of project managers and technical experts.
• Allocate resources effectively to achieve project goals.
• Foster a collaborative and productive work environment.
• Act as the primary point of contact for project stakeholders.
• Communicate project progress, issues, and risks to senior management and clients.
• Ensure alignment between technical teams and business objectives.
• Allocate resources, including personnel, hardware, and software, to projects.
• Optimize resource utilization and ensure teams have the necessary tools and support.
• Identify potential risks and issues related to project delivery.
• Develop and implement risk mitigation strategies.
• Ensure that projects are compliant with industry standards and regulations.
• Implement and enforce quality assurance processes and best practices.
• Conduct regular reviews and audits of project work.
• Handle changes to project scope, schedule, and requirements.
• Maintain project documentation and change control processes.

Techical Lead
Dogra Technologies Pvt Ltd   **August 2016 - August 2018**

• A technical lead typically has several years of experience in their chosen technical domain. They are often experts in one or more programming languages, frameworks, or technologies relevant to their field.
• Led a team of 10 developers in the design and implementation of a mission-critical software system, ensuring on-time delivery and within budget.
• Architected the system's framework, making strategic technology choices that resulted in a 20% improvement in performance.
• Conducted code reviews, provided mentorship, and established coding standards, resulting in a 30% reduction in defects.
• Imparted technical direction and guidance to the development team to create designs, resolve issues and manage the development schedule. Responsible for code reviews, code optimisation, reduced rework on code, and delivering the code as per the company standards. Experience in Continuous Integration, Continuous Delivery, and Continuous Deployment Pipelines
• Experience in software development life cycle (SDLC) in Requirements Analysis, Design, Development, Testing, Maintenance, and Enhancements.
• Experience in an Agile Software Development environment using AGILE methods and SCRUM.
• Strong Programming Skills in designing and implementing multi-tier applications using (PHP Framework (Yii, CodeIgniter, And Larval), JSON, HTML5, CSS3, MS SQL Server, And Web Services (Rest API)).

• Deeply involved in database design and modularised applications with database objects, such as Procedures, scheduler, Functions, Packages, and Database triggers and improves applications functionality and overall performance.

Web Developer
Dogra Technologies Pvt Ltd   **July 2015 - August 2016**

• Full Stack Developer with a strong working knowledge of development from scratch, POC, maintenance projects, post-production support, and performance improvement of the web application project.

• Quick learner with the ability to work in a fast-paced environment.

• Strong Programming Skills in designing and implementing multi-tier applications using (PHP Framework (Yii, CodeIgniter, And Larval), JSON, HTML5, CSS3, MS SQL Server, And Web Services (Rest API)).

• Experience in AWS Cloud, GCP infrastructure, and using various modules like but not limited to S3, SES, SNS, EC2, Route53, CodeCommit, and RDS.

• Experience in software development life cycle (SDLC) in Requirements Analysis, Design, Development, Testing, Maintenance, and Enhancements.
